Selecting Furniture Based On Color

When furnishing your home, it is important to understand how to select furniture based on color.

01 Yellow, red and orange colored furniture creates a positive vibe in kids room, dining area, and living room.

02 Furniture in tones of white, blue, light grey and similar shades creates a calm atmosphere in the bedroom.

03 Decide the furniture color as per decor theme such as neutral colors for a modern decor.

04 Consider the color of the room before choosing color of the furniture; You may choose neutral colored furniture if walls have bold color and vice versa.

05 Choose the color as per personal style to create a space that can be cherished for a long time.
