

Guide to Choosing Living Room Chairs

Chairs are an integral furniture element of a living room. Consider following factors when choosing living room chairs:

01

Choose the size of chair such that it doesn't look small when placed next to the sofa.

02

Measure the height, arms and seat width of sofa and buy chairs that are comparable to these dimensions.

03

The color of the upholstery should compliment the color of the sofa in the room.

04

Choose accent chairs to fill in smaller or corner spaces and add extra seating.

05

The style of chair should match the furnishing style of the living room.
