

Maintenance Tips For Leather Upholstered Furniture

In general, leather furniture is very easy to care for. Regular cleaning with a soft and damp cloth is enough to keep it fresh.

But a few maintenance tips can help in increasing the age of your leather furniture:

1

Do not leave leather furniture in direct sunlight.

2

Cover the outdoor leather furniture when not in use.

3

Do not put wet newspaper or printed material on it.

4

Immediately blot the spills, especially alcohol or acidic liquid.

5

If wet, let the leather furniture dry naturally.

6

Use only manufacturer recommended cleaners.
