

How To Choose Upholstery For Your Furniture?

Upholstery enhances the aesthetic of the furniture and the room decor by adding texture and color to the furnishings. Here are a few guidelines for selecting upholstery:

#1

Take note of the thread count; look for a higher count for a fine luxurious look.

#2

Opt for natural fabrics like cotton, cotton blend, leather, silk, vinyl, and wool.

#3

You can also pick synthetic upholstery made of acetate, acrylic, microfiber, nylon, polyester, rayon, etc.

#4

Choose a color that adds a sense of warmth while complementing other furniture & wall colors.

#5

Infuse patterned upholstery to break solid hues and add some dimension to your space.

#6

Check the amount of cushion filling in an upholstered chair or sofa; it should be neither too much nor too less.

#7

Opt for a material that is durable and easy to maintain or clean.
