

The Ultimate Home Theater Setup: Seating and Lighting

Seating and lighting are two key elements for transforming your home theater into a cinematic haven. Explore Ashley HomeStore's home theater seating and lighting options to create a comfortable and immersive cinema experience.

Home Theater Seating:

- **Modular reclining sectionals, reclining loveseats, and dual power recliners are ideal home theater seating options.**
- **Choose from solid neutral shades like gray or chocolate brown to complement your home theater decor.**
- **Opt for soft surfaces in your home theater to improve sound absorption and reduce echoes.**
- **Enjoy the convenience of built-in cup holders or arrange accent furniture nearby to hold drinks, snacks, remotes, and smartphones.**
- **For smaller spaces, explore options like chaise lounge chairs or curved home theater furniture.**

Home Theater Lighting:

- **Infuse a vibrant blend of lighting styles, including wall sconces and pendant lights.**
- **Consider ceiling lighting, such as glass pendants with a smoky hue, can lights, or LED acrylic flush mount lights.**
- **Look for metallic finishes, frosted globes, and delicate touches like thin draped metallic chains to create cinematic magic.**
- **Embrace dimmable home theater lighting to adjust the brightness according to your viewing preferences.**
- **Install home theater LED strip lighting beneath seating, along steps, or walkways to maintain an unobtrusive way to navigate during the show.**
